## **State Comptroller Issues Guidance to Secure Savings in Workers' Compensation Programs**

The Office of the State Comptroller today issued guidance to all government units in the state concerning cost-effective administration of their workers' compensation programs.

The guidance focuses specifically on government agencies' use of outside vendors for their workers' compensation programs and includes recommendations designed to promote cost savings and greater transparency in the way in which those programs are administered.

"Workers' compensation is one more area where government agencies may be able to secure savings for taxpayers," State Comptroller Matthew Boxer stated. "The guidance we're sending out today should assist agencies in achieving those savings."
